This is a mod that adds items, bosses, trinkets, consumables, enemies, and a completely new chapter complete with floors that expand on the lore of The Binding of Isaac. This is a very ambitious project, so it may take a long time to work on.

I - Start

The beginning of this mod revolves around the item named Isaac's Tomb, hence the name. Installing this mod will automatically spawn the item in Womb II's super secret room. When walking into this floor's super secret room, the room will have a completely new layout, as well as new decoration and obstacles. Additionally, two sarcophagi will be carved into the floor decoration between the item, as follows on this graph:

The item being in the middle of the room, and the blue boxes being where the sarcophagi should be.

As you pick up this item, the sarcophagi will open up, the first one being on the left, to reveal a mummified and more difficult version of the Greed mini boss. The second one being on the right will reveal a more mummified and difficult version of the Super Greed mini boss. You cannot fight the miniboss one the right before the one on the left. You also cannot leave the room as it will be blocked off upon taking the item. As such, this room is treated as more of a Boss Challenge room.

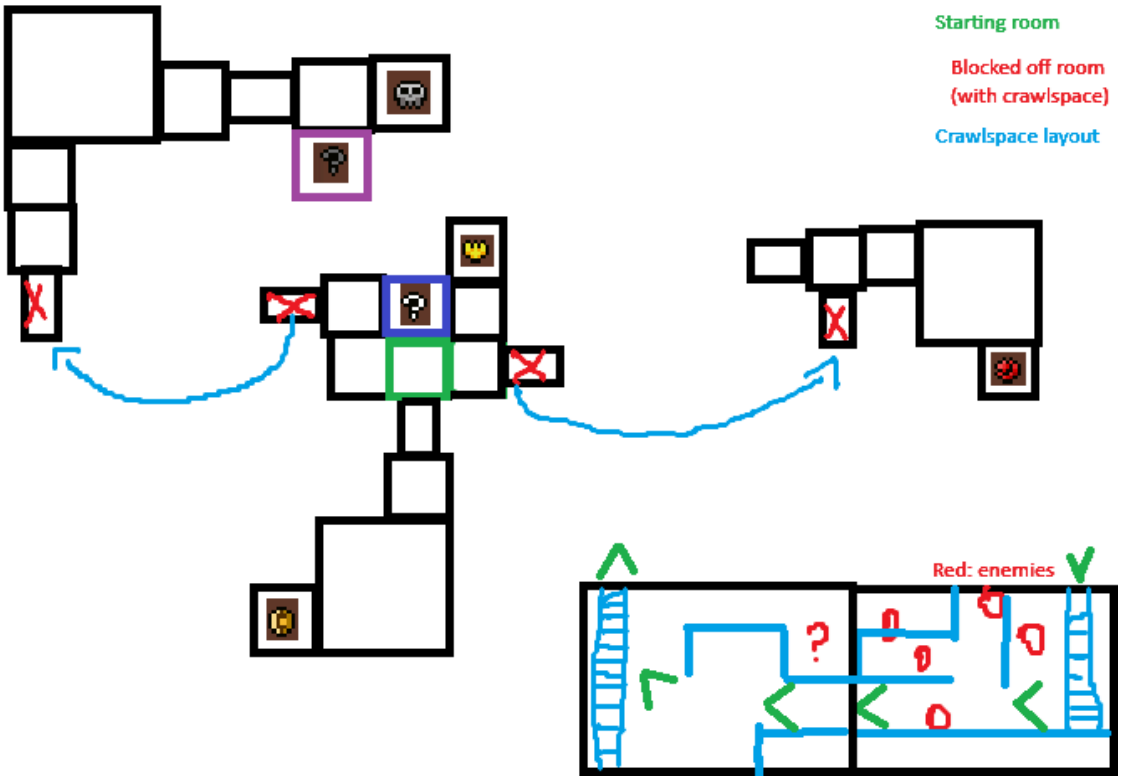

When defeating both minibosses, the room clear reward will be a Golden Key. Your goal now is to go to the starting room to find an Old Chest, which is the chest that this item spawns, however this version of the item is different as in, it spawns an Old Chest once you enter a new floor, not when you return to the starting room of the floor. All you need to do now is unlock the chest with the Golden Key and Isaac will jump in the chest, taking you to the Tomb. Isaac's Tomb(item) will be destroyed once you unlock the chest.

II - Tomb

This chapter serves as the alternative to the two different endgame paths that take place after the Womb, which are the Cathedral/Chest and Sheol/Dark Room. This chapter has two floors, the first floor's boss being a random boss from one of the new bosses in this mod(exception being ultra greed) and the second floor's boss being an endgame boss that grants you a new completion mark and a new unlockable for every character you complete the run as.

This area will have a lot of psychic-themed enemies as a reference to Rag Man, as he is a mummified boss that shoots homing tears. This floor will also have a lot of references that goes back to Egyptian mythology and history. It will also be very challenging, as I intend to follow the same sort of tradition that Antibirth/Repentance had in its alt floors. Potentially this chapter can have traps like boulders and arrow/spike traps, to follow stereotypical temple traps lol

The layout of this area will be different from the other floors players have encountered. A lot of rooms will be cut off with rock and rubble, not allowing access to that area. There will however be crawlspaces you can jump into in those areas that allow you to get around that rubble and appear in that area you wanted to go to, as seen in this graph:

This is how it would look. As you can see, the crawlspace has two rooms, one with enemies and an entrance ladder, and another with an item and an exit ladder. The layout of an actual Tomb floor will likely be much bigger, but this is just an example.

The Tomb's environment will be brighter than most floors. Cracks will show through the ceiling,

casting cracks of sunlight on the floors Isaac walks on. The floor will also have some sort of deserted theme to it, emphasizing its ancient aesthetic.

III - Bosses and Enemies

As mentioned before, this area will have a lot of psychic-themed enemies similar to Rag Man, including mummies and generally undead enemies. The bosses I don't really have many ideas for with the exception of Ultra Greed, in which I thought would be an interesting idea to put in as a random encounter boss in Tomb I. This could be an easy way to obtain a Greed Mode completion mark, however his 2nd phase I figure would not be viable to put in this floor due to how long it would take to beat the boss and the boss being too challenging for that chapter if I put in the 2nd phase. Ideally there would be 5 bosses I want to put in this floor, including the final boss at the end of Tomb II.

IV - Alternative floor

I was also thinking of adding an alt floor to this alt floor(lol) just like how Downpour, Mines, Mausoleum had alt floors(Dross, Ashpit, Gehenna). It would likely be called either the Duat, or the Crypt. Unlocking this alt floor would require you to defeat every boss in the Tomb, just like how you would defeat every boss in a floor to unlock its alt floor as well. Not much besides that though.

V - Items?

There will be treasure rooms that spawn in this chapter, and they have two choices just like the usual alt floors. However, one of them will always be hidden with a question mark to keep up this tradition.

VI - Extras?

I was thinking of adding an alternative shop just like how there's an alternative treasure room(planetarium). This alt shop would be called the Bazaar, and has its own themed items you can buy in it. It works exactly like the Planetarium does and requires you to complete the entire Tomb chapter once to unlock it.
